

BIOMARINE BUSINESS CONVENTION

12.13.14
OCTOBER
2015
WILMINGTON, NC, USA

FINAL PROGRAM

AQUACULTURE • BIOTECHNOLOGY • CHEMISTRY • ENERGY • ENVIRONMENT • FOOD • HEALTH

WHERE OCEAN MEETS INNOVATION...

NORTH CAROLINA: AMERICA'S PORT OF CALL FOR GLOBAL BIOMARINE SCIENCE AND BUSINESS.

The state of North Carolina boasts more than 300 miles (480 km) of Atlantic coastline, 12,000 miles (19,300 km) of estuarine shoreline and world-renowned universities, with programs related to marine sciences. That adds up to an ideal place to commercialize technologies from the ocean.

North Carolina is among the top three biotechnology states in the United States, with more than 600 companies employing over 60,000 people. Entrepreneurs, scientists and educators statewide are developing marine biotech opportunities in aquaculture, diagnostics, pharmaceuticals, natural products, fuel/energy, seafood preservation, fish feed, water-quality testing, waste remediation and bioproducts derived from algae.

Look inside to find out about:

YOUR BIOMARINE HOSTS AT WILMINGTON

Deborah Mosca, MBCOI

Dr. Mosca (Deb) is the Chief Executive Officer of the Marine Bio-Technologies Center of Innovation, headquartered at the Center for Marine Sciences in Wilmington with two regional offices in Morehead City and the Research Triangle Park, NC. She brings more than 35 years of experience in roles of increasing responsibility in various organizations including biotech, non-profit research institutions, and large Pharma. As a proven leader of multi-disciplinary project teams, she has guided the discovery and development of novel therapeutic agents for human, animal, and agricultural applications. In her current role, Dr. Mosca is responsible for creating the business strategy to drive the commercialization of marine biotechnologies from North Carolina's vast network of premier marine research institutions. Her efforts include the cultivation of a collaborative environment among universities, businesses, funding agencies, economic development agencies, marine biotech research advisory groups throughout North Carolina as well as national and international partners to deliver economic benefits statewide.

Randall Johnson, NCBiotech

Randall Johnson has extensive experience in local and regional economic development, with a focus on entrepreneurship, cluster development, and knowledge sector development. In his role as the NC Biotechnology Center Southeastern Office Executive Director, he works to strengthen the regional economy and to improve the quality of life across North Carolina, through economic development action related to marine biotech, industrial biotech, renewable bioproducts/energy, clinical research, and agricultural biotech. Johnson was awarded the U.S. President's Volunteer Service Award, a national honor award recognizing individuals who have answered the call to make a lifelong commitment to volunteer service. He serves on the boards of business, civic, and arts-related organizations in the region and state, including the NC Economic Developers Association, and the NC Sustainable Energy Association. His work with statewide partners led to the creation of NC's Marine Bio-Technologies Center of Innovation.

Pierre Erwes, BioMarine

Pierre Erwes is an oceanographer by training with later specialization in IT, robotics and marketing. He is an entrepreneur who has over twenty five years of international experience, primarily in the areas of new technologies, biotech, and marine bio-resources. He exercised managerial responsibilities at several companies including Global Resources, a joint venture of 6 international contract sales organizations. Since 2007 he has been developing the BioMarine platforms: BioMarine leads the way to biomarine trans-sector discussions, business opportunities and consolidation of the industry. BioMarine is not only the place of meeting and exchange for professionals in our industry, but above all it is the strategic center of action and initiatives for key stakeholders in the marine bioresources sectors. Finance, research and industry have learned to use the platform to diversify their cross-sectorial knowledge, strengthen their existing partnerships and build new opportunities.

What if?

What if we had a sustainable DHA source that was also traceable, safe and provided added health benefits to fish?

Alltech wants to help reduce the amount of fish oil used while increasing the levels of DHA available to farmed fish.

Better solutions.
A better future.

Delivering Leaders for Aquaculture

When you need a leader with judgment who gets results, you need a search firm that understands your business.

With more than 34 years focused exclusively on the interrelated realms of food, seafood, and life sciences, Kincannon & Reed has broad and deep relationships with impact players across the aquaculture value chain.

Our clients know that this focus gives them a competitive edge in today's war for talent. It's key to our ability to find and deliver the leaders aquaculture and seafood companies want in today's competitive environment.

Contact: Greg Duerksen, President, gduerksen@KRsearch.net • Michael Whitney, Managing Partner & Head, EMEA, mwhitney@KRsearch.net • Fredrik Lundén, Managing Director, flunden@KRsearch.net.
We recruit leaders for organizations that feed the world and keep it healthy. www.KRsearch.com

MONDAY 12TH OCTOBER 2015

9:00 to 4:00 pm BUSINESS & INNOVATION TOUR

- 9:00 am** Pick up from downtown hotels
Shuttle to **UNCW CREST Research Park**
- 9:30 am** Welcome coffee at **UNCW CREST Research Park**
- 10:00 am** **Tour UNCW CREST Research Park:**
MARBIONC Building, Center for Marine Science, Shellfish Research Hatchery, walk to pier
- Noon** Shuttle to **Bluewater Waterfront Grill** for lunch
- 2:30 pm** Shuttle to **UNCW Aquaculture**, tour facilities
- 4:00 pm** Shuttle to downtown hotels

1:00 to 5:00 pm REGISTRATION DESK IS OPEN AT UNION STATION

5:30 to 7:30 pm WELCOME RECEPTION

Organized by **MBCOI** and **NC Biotech Center** at the **USS North Carolina Battleship** (1 Battleship Road Northeast Wilmington, NC 28401).

Welcome words from **Mayor Bill Saffo**, City of Wilmington.

Transportation by water taxi or trolleys - alternate indoor venue if weather does not permit. Featuring **locally produced seafood** from North Carolina AND the **Mid-Atlantic Bluegrass Band!**

BIOMARINE IN SCOTLAND – COLLABORATE AND INNOVATE IN AREAS OF WORLD LEADING RESEARCH

www.europeanmarinesciencepark.co.uk

All in one place.

Europe's leading marine bioprocessing facility is situated in the high north.

BioTeP (former NAMAB) is one of few one-stop-production facilities in our business. That means you can test the bioprocess as well as run your bio test production all in one place.

Located in Tromsø, you have easy access to world class bioprocessing competence, extreme quality focus and state-of-the-art equipment.

And you are welcome to explore the endless possibilities.

TUESDAY 13TH OCTOBER 2015 (AM)

8:00	Registration & Welcome coffee	
9:00	Opening plenary - webcasted live LIVE STREAM	
	Welcome words from Pierre Erwes, Deborah Mosca, and Randall Johnson Chris Chung, CEO, Economic Development Partnership of North Carolina Video message from HSH Prince Albert II of Monaco	
10:00	CEO Interviews LIVE STREAM	Investment Track <i>Moderator: Gregory Rall Director Business Development Europe & Asia, BioMarine, Germany</i> 10.05 - 10.20: Biomimetx Lda, Portugal Cristina Simões, CEO 10.20 - 10.35: R.C. INNPharma LLC, USA John Colman, CSO 10.35 - 10.50: Lagosta SARL, Switzerland Christophe Maier, Founder & CEO 10.50 - 11.00: Pacífico Aquaculture, Mexico Omar Alfi, Managing Director
	10.05 - 10.15 Thad Simons, Managing Director, "The Yield Lab", Senior Executive Advisor to Board of Directors Novus International, President Board of Directors at IFAMA, past President & Chief Executive Officer Novus International 10.15 - 10.25 Lionel Genix, President & CEO, Seppic Inc., USA	
10:30	Session 1: LIVE STREAM What you really need to know about marine ingredients for food and nutraceutical applications <i>Moderator: Mari Sundli Tveit, Rector, Norwegian University of Life Sciences (NMBU), Norway</i> Panelists: Øyvind Fylling-Jensen, CEO NOFIMA, Norway Blainde Baert, Micro Algae Project Manager, Roquette, France Mark Rottman, COO, Blue Wave Marine Ingredients, USA	
11:00	Networking Break	
11:30	Session 2: LIVE STREAM Marine Biotechnology, is it happening? <i>Moderator: Noémie Giguère, Executive Director, Technopole Maritime du Québec, Canada</i> Panelists: Michelle Sabaoun, Dir. Biotech, Brunswick College, USA Ragnhild Whitaker, Research Manager Marine Biotechnology, Nofima, Norway Dan Gressel, Chairman TransAlgae, Israel	Investment Track <i>Moderator: Gregory Rall</i> 11.35 - 11.50: Shure Foods, USA Gabe Dough, Founder-CEO 11.50 - 12.05: Ocis Biotechnology, USA Lisa Day, Business Development 12.05 - 12.20: Deinove, France Emmanuel Petiot, CEO 12.20 - 12.30: Transalgae, Israel Daniel Gressel, Chairman
12:00	Session 3: LIVE STREAM Algae cell factory still science fiction? <i>Moderator: Deborah Mosca, CEO, Marine Bio-Technologies Center of Innovation, USA</i> Panelists: Lionel Genix, President & CEO, Seppic Inc. USA Hywel Griffiths, CSO, Fermentalg, France Fabrice Bohin, CEO Eviagenics, France	
12:30	Keynote Address : Quebec's Maritime Strategy: marine biotechnology as a key economic development tool Georges Farrah, Associate General Secretary, Secrétariat aux Affaires Maritimes, Government of Quebec, Canada	
12:45	Networking Lunch or invitation-only VIP Lunch Québec
